

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

AMERICAN JOURNAL OF BOTANY

OFFICIAL PUBLICATION OF THE
BOTANICAL SOCIETY OF AMERICA

CONTENTS

- The growth of field corn as affected by iron and aluminum salts
CHARLES HOMER ARNDT 47
- Control of the sexual state in *Arisaema triphyllum* and *Arisaema Dracontium*
JOHN H. SCHAFFNER 72
- A demonstration of numerous distinct strains within the nominal species *Pestalozzia Guepini* Desm CARL D. LA RUE AND H. H. BARTLETT 79

PUBLISHED

IN COOPERATION WITH THE BOTANICAL SOCIETY OF AMERICA

BY THE

BROOKLYN BOTANIC GARDEN

AT 41 NORTH QUEEN STREET, LANCASTER, PA.

AMERICAN JOURNAL OF BOTANY

DEVOTED TO ALL BRANCHES OF BOTANICAL SCIENCE

ESTABLISHED 1914

EDITED BY A COMMITTEE OF THE
BOTANICAL SOCIETY OF AMERICA

EDITORIAL COMMITTEE

C. E. ALLEN, Editor-in-Chief,
University of Wisconsin

WILLIAM CROCKER,
*The Thompson Institute
For Plant Research, Inc.*

H. H. BARTLETT,
University of Michigan

C. STUART GAGER, Business Manager
Brooklyn Botanic Garden

ARTHUR H. GRAVES,
Brooklyn Botanic Garden

R. A. HARPER,
Columbia University

I. F. LEWIS,
University of Virginia

C. L. SHEAR, *Bureau of Plant Industry*
(Representing American Phytopathological Society)

The Journal is published monthly, except during August and September. Subscription price, \$6.00 a year. Postage to all foreign countries, 20 cents a volume on annual subscriptions. Single copies 75 cents. Back numbers, 75 cents each; \$7.00 a volume, post free.

The pages of the Journal are open to members of the Botanical Society of America, or to candidates approved for membership.

Manuscript offered for publication should be typewritten, and should in all cases be submitted to the Editor-in-Chief.

Papers are limited to 20 pages in length, exclusive of plates, except that additional pages may be arranged for at cost rate to authors (approximately \$3.00 a page).

Proofs should be corrected immediately on receipt, and returned to American Journal of Botany, Brooklyn Botanic Garden, Brooklyn, N. Y.

Illustrations, other than zinc etchings, and tabular matter should, in general, be restricted to approximately ten percent of the number of pages of text. Authors may be charged at cost rates for illustrations and tabular matter in excess of that amount (approximately \$6.40 a page for tabular matter; 15 cents per square inch for half-tones).

Separates should be ordered when proof is returned. Fifty copies without cover will be supplied free; cover and additional copies at cost.

Remittances should be made payable to American Journal of Botany. Ten cents must be added to all checks not drawn on New York City banks.

Claims for missing numbers should be made within 30 days following their date of mailing. The publishers will supply missing numbers free only when they have been lost in the mails.

Correspondence concerning editorial matters should be addressed to Prof. C. E. Allen, University of Wisconsin, Madison, Wisconsin.

Business correspondence, including notice of change of address, and directions concerning reprints, should be addressed to American Journal of Botany, Brooklyn Botanic Garden, Brooklyn, N. Y., or 41 North Queen Street, Lancaster, Pa.

Insure your Herbarium

**against damage by Insects, Dust,
Smoke, Fire, Water and
Atmospheric Changes**

Your collection deserves permanent protection against the ravages of insect pests, the contamination of dust and smoke laden air, and the deleterious effects of changing atmospheric conditions.

The All Metal Herbarium Case will give that protection for many generations, at a yearly cost that is negligible.

The All Metal Herbarium Case

Smoke, dust and vermin can enter this case only when the door is open. A heavy metal bead on the door fits snugly into a channel lined with specially treated padding against which constant pressure is maintained by sturdy spring locks.

The case is rigidly partitioned, as illustrated, to provide twenty-one compartments of standard size for mounting sheets. The exterior is attractively finished in either dark green or black enamel. Dimensions: 17 x 38 x 42 1/2 in.

Order No. 10J40. Price, crated, F.O.B. Waverley, \$100.00

CAMBRIDGE BOTANICAL SUPPLY COMPANY

Laboratory Equipment for All Sciences

WAVERLEY

MASSACHUSETTS

A Real Vasculum

CAPACIOUS—to hold a good day's collection.

STRONG—to withstand the rough wear of field usage.

Attractively finished in fine green japanning, with hinged cover running the full length of case, wire latch, handle for hand-carrying and metal loops for shoulder strap.

Made in 3 sizes:

A	16 x 7 1/2 x 5	inches	each	\$3.50
B	19 x 8 1/2 x 5 1/2	inches	each	3.75
C	21 x 9 1/2 x 6	inches	each	4.00

THE OVEN WITH THE DRAWER

A Scientific Drying Oven for Scientific Men

The De Khotinsky Drying Oven

Electrically Heated and Controlled

No. 9830

Have you ever measured the difference in temperature between top and bottom shelves of the drying oven you are using? If not, you will be interested in making this simple test and in the conclusions to be drawn from the result. It has been our experience that this temperature difference between shelves varies from 10 to 30 degrees C. in electrically heated ovens of different makes. As a result the careful worker has found it necessary to use a single shelf only of his drying oven if he wishes to obtain consistent moisture data.

THE DE KHOTINSKY OVEN IS DIFFERENT

The primary object in developing the De Khotinsky Oven was to overcome this serious defect and to produce a **uniform drying space**. In working out the design other features were considered and adopted and, after five years of experimental work in our own shops, preceded by several years of individual work by the Captain at the University of Chicago, we have no hesitation in stating that

THE DE KHOTINSKY OVEN IS A BETTER OVEN

If you are considering the purchase of an electric drying oven, or if you are interested from a scientific standpoint in drying ovens, allow us to send you our **Bulletin No. 61 JB**, explaining the "why and how" of the De Khotinsky Oven, and ask us for proof that it is a better oven.

Leitz Microscopes are the Standard of the World

Leitz “Non-Objective Binocular” Microscope

The Modern Research Type

This model **originates** with Leitz and was successfully introduced in 1913. Other firms have copied this model, but the individual design, superior workmanship and efficiency of the Leitz pattern will fully protect the prestige for the original type.

POINTS OF MERIT

1. Binocular vision.
2. Perfect accommodation to any interpupillary distance.
3. Adjustment for any difference in refraction between the eyes.
4. Complete elimination of eye strain.
5. Improved quality of image.
6. Parallel eyepieces.
7. The possibility of using any favored objective from the lowest power to the highest oil immersion.
8. No reduction in numerical aperture.

Complete Stock of Laboratory Apparatus, Glassware, etc., always on hand for prompt delivery. Equipping complete laboratories is our specialty; our import service is reliable and, through our connection, one of Economy. Estimates are rendered promptly.

Write for Pamphlet No. Z-1003.

SPENCER Convertible Binocular Microscope, No. 58

In addition to regular microscopic work, this instrument is **convertible**:

For examining large objects on a table.
For examining vertical surfaces.
For examining high objects.

Advantageous Features

- I. Inclination joint.
- II. Removable stage.
- III. Long range of upward and downward movement.
- IV. Adjustable arm covering entire stage.
- V. Mirror adjustable in all directions.
- VI. Accommodation for pupillary distance.
- VII. Automatic shutter cutting off light to either eye.
- VIII. Patented solid objective mount, holding lenses in absolute alignment.

ADAPTABILITY, USABILITY AND EFFICIENCY AT ITS BEST

A Binocular Microscope for Research Work

Microscope FAE8
Price, \$227.50.

Microscope FAE, binocular type, using Single Objectives for the full range of powers, is a most useful instrument for prolonged observation. It is used with great satisfaction by leading research and laboratory workers. The following advantages are offered:

As the eyepiece tubes are mounted in a parallel position, both eyes are free from the strain of accommodation or convergence.

The user is given the impression of increased penetrating power, permitting him better to interpret what is seen.

It yields brilliancy of field and improved quality of image.

Provides maximum range of adjustment for interpupillary distance; left eyepiece is adjustable.

As the right eyepiece is rigid and vertical, the Camera Lucida may be used if desired.
